GENERAL TRADE CATALOGUE

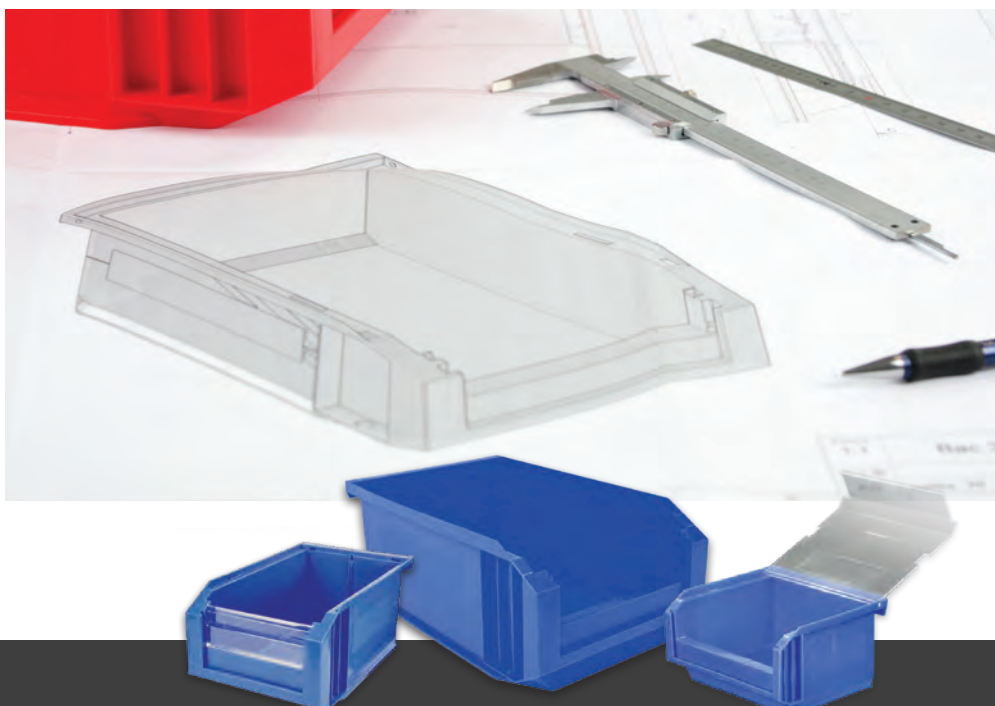

→ NOVAP, 40 YEARS EXPERIENCE

Established in Oyonnax for more than 40 years, Novap designs and manufactures a large range of sign products (Construction and Industrial sites, PPE, descriptive signs for interiors...) and for storage (semi-open-fronted bins, organizer racks, step stools...).

The history and development of the Company have been built on permanent innovations (adjustable post, telescopic barrier, Speed Tape®, Novabac®...) that continually increase an already broad range of products.

SPECIALIST CHAINS

MADE IN POLYETHYLENE AND POLYAMIDE

LUMINESCENT POLYETHYLENE CHAIN

For a better visibility at night.

In the event of a sudden reduced visibility, these chains emit an intense bright light. The intensity and duration of the light depends on the amount of time it has been exposed to a light source.

Dimensions \varnothing 6 mm: 53 x 21 x 6 mm.
Dimensions \varnothing 8 mm: 70 x 27 x 8 mm.

Link characteristics are the same than for the Signal barrier chains.

TRAFFIC CONES

POLYETHYLENE AND PVC

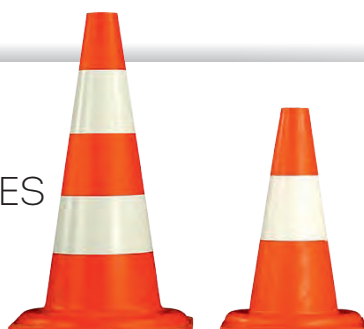

The work site cone allows to lay out a perimeter, to signal a temporary danger or to secure a risky zone.

The PE cones are dedicated to the standard bordering or for the work sites. The fluorescent orange color provides more visibility.

The PVC cones are more resistant to the crushing and are mainly used on the road working.

ECO PE CONES WHITE STRIPES

Essential for all barricades.

Fluorescent orange polyethylene low density (PELD)

Cone 30 cm, 350 gr - 1 silk-screened white stripe

Cone 50 cm, 790 gr - 2 white stripes. Adhesive film.

SPEED TAPE®

PRACTICAL AND CLEVER

Ergonomic handle.
European hole for direct shelving

Lock bolts to maintain the roll.

Roll can easily be changed.

Stopping system to block the ribbon

Ribbon cutting system.

- The Speed Tape® from NOVAP is certainly one of the best innovation to delimit your construction sites. This Speed Tape® ribbon reel stand will make you save significant amount of time on your building sites.

To try it means to adopt it: helpful, clever, strong and economical.

- The Speed Tape® is a construction work ribbon supply hub with an integrated cutting system: ergonomically excellent, ribbon is quickly unwinded and cut.
- The Speed Tape® accepts 50 mm ribbons, 100 or 200 meters length.
By default, the Speed Tape® will be delivered including a 50 mm x 100 m ribbon in red/white.
- The Speed Tape® has a stopping system to block the ribbon free end to both the right and the left; that avoids the ribbon to unwind inadvertently.
Once installed in the Speed Tape®, ribbon can be easily unwinded and cut thanks to the cutting system in the ribbon running axis.
- The Speed Tape® is available in the following colours: red, black, white, green, yellow and bright orange.

SPEED TAPE®

Speed Tape® 50mm x 100 m and 50 mm x 200m.

Available in 6 colours: red, bright orange, white, black, green, yellow.

Delivered within a filmed packaging with a display label.

BEACON LED LIGHT

- Beacon LED light with cigarette lighter socket 12 and 24 V.
- Easy to install with its magnetic base and suction cup.
- The solution for agricultural tractor, earthwork vehicles, trailer...
- Low energy consumption thanks to the LED technology offering an interesting light output
- 2 fixing possibilities: magnetic or through the suction cup.
- 3 ways of working: rotating, slow flashing, fast flashing.
- Unbreakable glass.
- Suits to many vehicles because of the connection on 12 and 24 V.
- Protection against polarity reversal.
- Waterproof housing.
- Complies with UNECE R65 and EC R10 regulation.

PEDESTRIAN DISPLAY

NOVAP IS CHANGING FOREVER THE PEDESTRIAN CROSSING

This patented product has been developed by the NOVAP Cy,
in order to secure the pedestrian crossing.

Already appreciated by the elected representatives who had
the possibility to discover it at a preview, the pedestrian
display gives the possibility to warn, to sign and to secure
the pedestrian crossings.

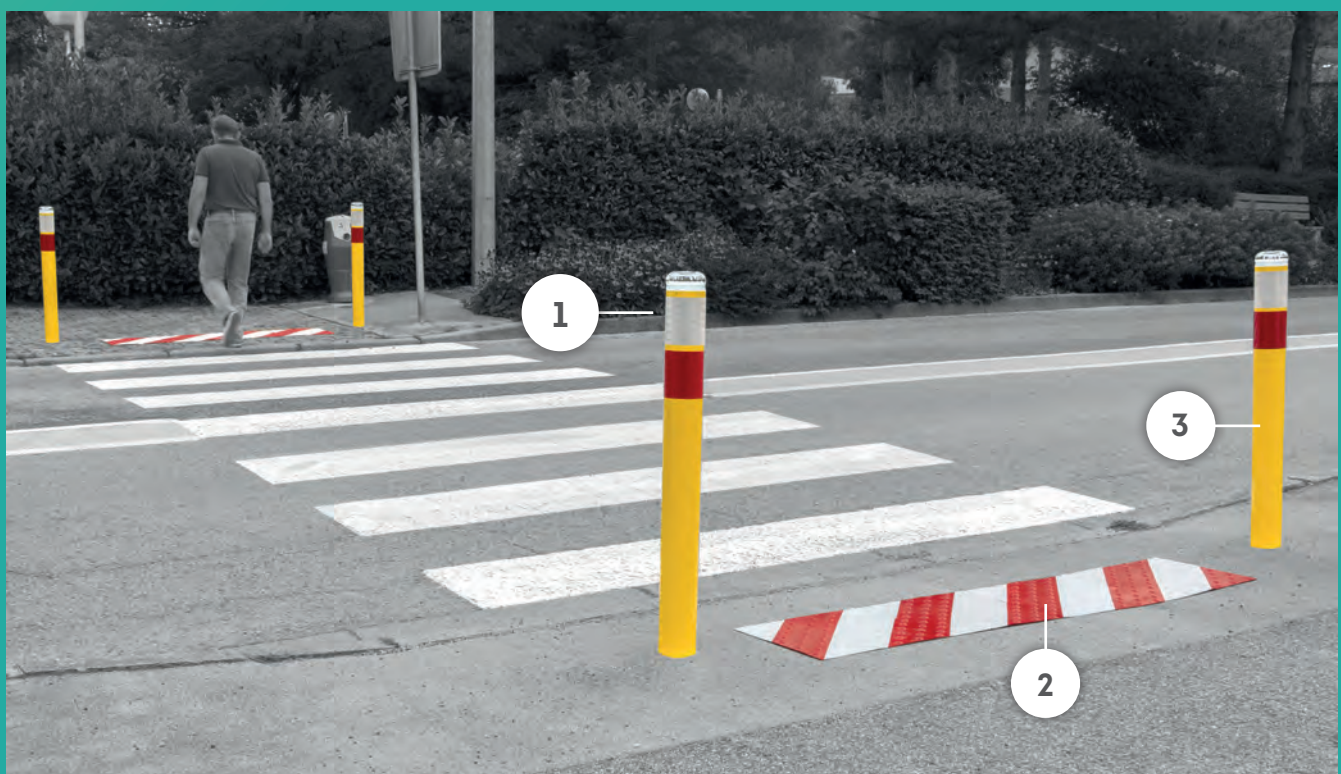

PATENTED
PRODUCT

5
YEARS
WARRANTY

OPTIMAL
SAFETY

VISIBILITY + ACCESSIBILITY + SIMPLICITY = OPTIMAL SAFETY

1 VISIBILITY:

The solar lights are automatically synchronised from the first start on in order to increase their efficiency. Once they are fully loaded, they are able to perform during 4 days without any loss of intensity.

2 ACCESSIBILITY:

2-tones tactile slabs allow to inform blind and visually impaired people about a pedestrian crossing but as well people who are focused on their smartphone or simply inattentive.

3 SIMPLICITY:

Very easy to install. No electric connexion is required. This display is composed of 2 lighten posts and 4 two-tones tactile slabs to secure the pedestrian crossing.

PRACTICAL GUIDE TO SET UP YOUR PEDESTRIAN DISPLAY 2 POSTS + 4 TACTILE SLABS

STEP ①

I SELECT MY 2 POSTS

- **Choose 2 posts** with the same finish among our range.
- **Posts with 1 white retroreflective stripe class 2.**

TACTILE GUIDING STRIPES

ADVANTAGES

- COMPLIES WITH NF P98-352 NORM
- VISUAL AND STRUCTURAL CONTRAST
- UV RESISTANT

TACTILE GUIDING STRIPES 4 RIBS

These stripes structurally and visually contrasted enables blind or visually impaired people to be guided by detecting relief with their walking stick or feet. These stripes resist to UV and to salts for an optimal utilisation outdoor or indoor. To glue or to adhesive. Complies with the **NF P98-352 norm**.

INSTALLATION ADVICE

Tips for indoor use:

Clean up the floor (not wet) with a broom and put the stripes at their final position in order to delineate the exact surface with the masking tape.

Set the right double sided adhesive on the back of our tactile guidance stripes. Install once more the stripes at the foreseen place by pushing a slight pressure.

Remove the masking tape and your installation is achieved.

Tips for outdoor use:

Use the security tools: glasses, gloves and protection mask.

Clean up the floor (not wet) with a broom and put the slabs at their final position in order to delineate the exact surface with the masking tape.

Remove the stripes and apply the NOVAP glue on the lower side before replacing them at their final position by pushing a slight pressure on the stripes.

Remove the masking tape and wait 8 hours for a complete drying.

Your installation is achieved.

To fix these models it will be compulsory to use: 1 fixing display plus the glue which is proposed separately.

Tactile guiding stripes. In stainless 316 and in compliance with the norm, these stripes help blind or visually impaired people to get their bearings.

INSTALLATION SOLUTIONS LAYOUT ACCESSORIES AND PPE

ADVANTAGES

DESIGNED TO STICK THE
TACTILE SLABS AND THE
GUIDANCE STRIPES NOVAP

USE

The polyurethane glue NOVAP is dedicated to stick the tactile slabs and guidance stripes NOVAP in PU.

TO PREPARE SUPPORTS

Whatever the support is, it will be compulsory to respect the rules below in order to get a perfect result.

The surface has to be clean, dry and without fat and dust.

The smoother the surface is, the best the gluing effect will be.

It is not recommended to glue on a cold surface.

The gluing effect works with temperatures above 10°C.

For any new support like cement, wood, concrete or asphalt, please check that it is older than at least one month.

POLYURETHANE GLUE 1KG AND 3.5KG

MASTIC FOR JOINING MATERIALS

ADVANTAGES

- CAN BE PAINTED
- WITHOUT SOLVENT
- WATER RESISTANT
- UV RESISTANT

BLACK ALL-ROUND **GLUE**

To be used to stick our products like the stainless guiding stripes or corner protectors.

Black all-round glue to join, to stick or to seal all materials on any support (smooth, wet, dry, porous, uneven...)

Without solvent, this glue is water and UV resistant for an outdoor or indoor use.

- Capacity of the tube: 290ml
- Can be painted
- Black colour glue
- To be used between +5°C and +25°C
- Final resistance after 24 hours

CAR PARK SPEED RAMPS

ADVANTAGES

- RESISTANT TO OILS
- NIGHT AND DAY VISIBILITY
- EASY TO INSTALL
- EQUIPPED WITH BACK-REFLECTORS

FOLDABLE SPEED-BUMP

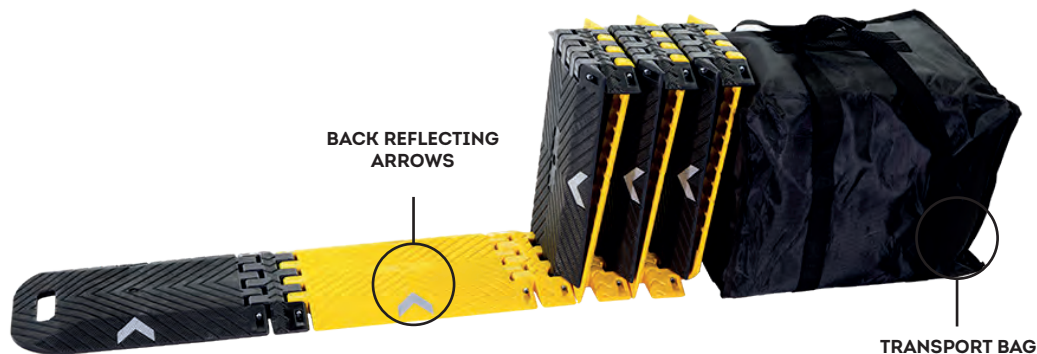

Developed to be quickly installed and as well quickly removed. It will slow down temporary the traffic, because of a sudden event. This speed bump is foreseen for a temporary use: quick to install or to remove, it remains very efficient, stable and will bring down the speed limit to 30km/h.

It can be installed with one hand and easily removed. Back reflecting arrows class 2.

Delivered with a transport bag for an easy carriage and as well and easy storage.

- Made out of rubber
- Easy to install and to remove
- Ideal for temporary use
- Slow down the speedness to 30 km/h
- Retroreflective adhesives
- Carriage handles
- Maximum axle load: 20 tonnes
- Weight: 12 kg

REF.	DIMENSIONS	PACKING	PRICE CODE
6100362	3000 x 250 x 25 mm	1	1146

ONE-PIECE SPEED BUMP

- Retroreflectives stripes class 2
- Speedness reduction up to 30 km/h
- 4 Fastening included
- 2 lengths
- Made out of rubber
- Maximum axle load: 20 tonnes
- Height: 50mm

HOSE AND CABLE PROTECTORS

ADVANTAGES

- EASY ASSEMBLING
- MODULAR CONCEPTION
- PROFESSIONAL RESISTANCE

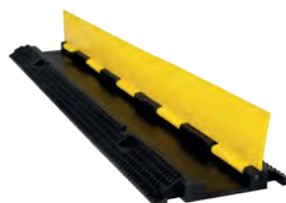

CABLE PROTECTORS

Hose and cable protectors with lid manufactured in rubber for a better resistance. Compulsory to protect tube, cable, hose, wiring... from vehicles traffic and pedestrians. The yellow-black colour allows fast recognition and ensures the traffic participants. It will not only protect the cables but as well slow down the vehicles. Its rough surface will provide an anti-skid effect for the pedestrians.

Thanks to its modular design, several hose protectors can be connected for significant length of cables.

PARKING BAY MARKERS

ADVANTAGES

- EFFICIENT SHOCK ABSORPTION
- DELINEATE THE CAR PARK SPACES
- VISIBLE AT NIGHT

Manufactured in rubber for an efficient absorption of the shocks, our park stops have been developed to protect and avoid any damages on a sidewalk, on urban property, a building or any vehicles. Helpful in organizing car park areas and to protect vehicles from damage that can result from steep parking situations or confusing wall projections. Most of time installed in shopping mall car park or in public car park, they can be installed in private location or in co-ownership residence. Because of the efficient reflective stripes, our park stop finds its long-term use both indoor and outdoor.

Can also be mounted on buildings and used as impact protection, e.g. in loading zones.

CABLE PROTECTORS

WORKSITE AND INDOOR

CABLE PROTECTOR WORKSITE

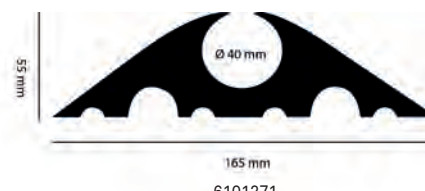

This cable protector is the one you need to protect your cable and hose during the work or in the areas where vehicles are passing. Made out of anti-skid black rubber, it resists to a maximum load of 40 tonnes and follow all the deformation of the ground.

Easy to install. Either you stick it or you just put it on the floor. It will for sure secure your installation. You can cut it according to your need.

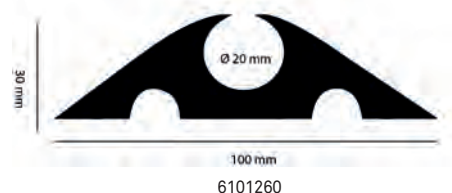

- Ideal to bundle and protect several cables or hose.
- Anti-skid rubber
- Resistant to a maximum load of 40 tonnes

FITTED STEEL POST ON BASE OR TO BE FIXED

+ BS 40 FIXING

+ CONNECTION COLLAR FIXING

How to choose the right fixing for your sign:

For large signs, you should better go for the connection collar.

For the small sizes, BS 40 is the right solution.

Signs are not included.

Our steel posts:

- Ø50 mm - Height 80, 110 or 130 cm.
- On steel base Ø 420 mm, or fixing by sealing with sleeve.
- Delivered with BS 40 fixing or with connection collar according to the model.

Our galvanised post:

- Ø 50 mm - Height 2.90 m.
- Fixing by sealing with sleeve.
- We consider to seal by a depth of 40cm. The final height of the post will be 2.50 m.

PRACTICAL GUIDE TO CHOOSE A SIGN

"SAFETY SIGNS ARE ESSENTIAL
ANYTIME THAT ON YOUR PLACE
OF WORK, RISK CAN'T BE
AVOIDED OR FORESEEN."

STEP ①

COLORS & FORMS

-  Stop and prohibitions
-  Warning
-  Safety
-  Mandatory

-  Obligations, bans
-  Warning signs
-  Safety, escape, bans and addres signs
- 

STEP ②

SELECT THE SUPPORT

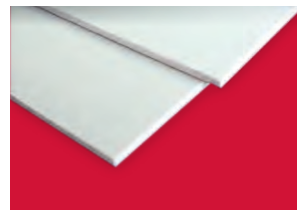

According to the use you will make of the sign, we suggest 3 possible supports. Indoor, outdoor, temporary or perennial...

SELF ADHESIVE VINYL

- Easy to use
- Ideally on flat surface
- Good ageing
- Anti UV inks

RIGID PLASTIC (HIPS)

- Excellent durability
- Light and economical
- Marks for an easy installing
- Anti UV inks

RIGID ALUMINIUM

- Resistant to corrosion
- Pretty strong
- Holes for an easy installation
- Anti UV inks

STEP ③

FINISHES

WHAT TO CHOOSE FOR DAY AND NIGHT

STANDARD • CLASSIC

Anti-UV treated prints for a long durability. Perfect visibility by day.

RECOMMENDATIONS

- Night visibility is not essential
- Signs for both indoor and outdoor uses.

RETRO-REFLECTIVE CLASS I

Visible material by night up to 100M with a direct lighting

Reflect the direct light

RECOMMENDATIONS

- Garage gate
- Car park
- Tunnel
- Entrance gate
- Emergency vehicle

RETRO-REFLECTIVE CLASS II

Material visible by night up to 250M with a direct lighting

Reflect direct light 3 times more than Class I

prismatic structure coating

RECOMMENDATIONS

- High traffic
- Strong light pollution
- Very important dangers
- Intervention vehicles

PHOTOLUMINESCENTS

STANDARD: Visible material by night without lighting

Solar energy accumulation
Reproduction by night

RECOMMENDATIONS

- Emergency exit
- Fire exit
- Low artificial light
- Locating in case of powercut
- Leisure/Decoration lighting

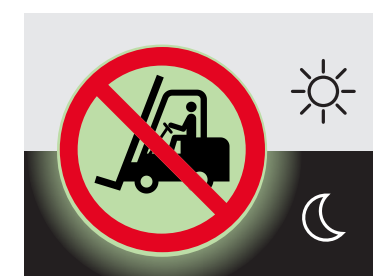

HIGH PERFORMANCE: Material visible by night on an intense way and long lasting without lighting.

Solar energy accumulation
Reproduction by night

RECOMMENDATIONS

- Fire exit
- Emergency exit
- Voluminous spaces
- Sensible sites

OUR BEST SELLERS PHOTOLUMINESCENT

In the dark, these photoluminescent discs and signs offer an intense light. The intensity and luminescent time depends on the time exposed to light source. To obtain the best effect, it is better to place these discs and signs in sufficiently lighted locations.

We propose 2 qualities of photoluminescent signs: Standard and High Performance (Look at page 169). The reference below are for standard photoluminescent signs. Please inform us if you are interested in the High Performance quality.

HIGH VISIBILITY

DISCS & SIGNS

ADVANTAGES

A YELLOW
FLUORESCENT
OUTLINE INCREASE
THE VISIBILITY
OF THE SIGN

The new conception of the sign, recommended to increase the visibility of the signage as been developed, designed and manufactured by NOVAP.

The bright yellow used gives a totally different aspect in comparison with traditional signage. It will bring for the end user a far better visibility.

All these models are registered.

PIPE MARKERS

Complies with the latest European norms. Mandatory for all substances and mixtures inside the pipes. The tracking of the fluids is done with the colors (water, gas, air...) and the state (drinkable, natural, purified...) of the substance. The interest of the tracking is to clearly and quickly identify the contents of the network and hence avoid any confusion which could lead to any accident and as well to facilitate the action of professionals in case of disaster. The running direction is indicated by an arrow and is compulsory to stop the network upstream in case of emergency.

Colors in accordance with legislation: Purple: Acid / Blue: Air / Green: Water / Orange: Gas / Red: Fire / Brown: Flammable liquid / Grey: Steam

- High resistance self adhesive
- Stable to humidity variations
- Immediate and permanent fixing
- Withstands temperatures from -40° to +90°

ADJUSTABLE A-BOARD SIGN

ADVANTAGES

- ADJUSTABLE
- THE RANGE PROPOSES THE MAIN COLOURS AND SYMBOLS ABOUT SECURITY

HOOKS
FOR
SIGNAL
CHAIN

**Only 1
ADJUSTABLE
A-Board sign for
several messages:
place saving !**

**Set up your A-Board
sign according to your
needs !**

For any customization,
please contact us.

**Excellent stability
thanks to a shaped
base**

**Ergonomic handle for a
better grip**

**Removable
messages**

**Slate easily removable
through an easy manual
pressure**

**Locking in folded
position**

FRAME :

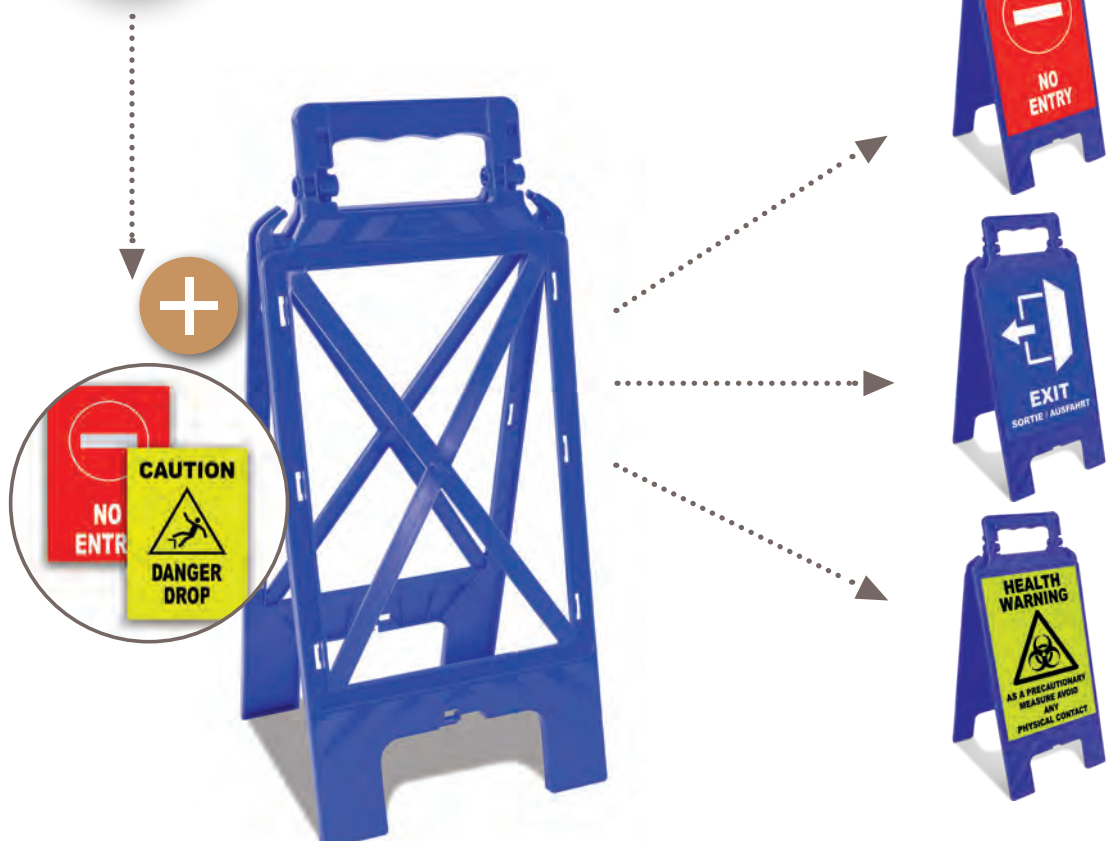

- Material: PP
- Height: 608 mm
- Width: 272 mm
- Thickness (folded): 28 mm

SLATES :

- Material: ABS
- Dimension: 358 x 260 mm
- Thickness: 12 mm
- Quantity of mounting clips: 6

ANTI-SKID ADHESIVES

For indoor marking

- Anti-skid adhesive to make any potentially slippery and dangerous area secure and thus avoid all falling risks. Its rough surface gives it a very strong anti-skid power. Can be positioned on all kind of surface (stairs, warehouse, office, basement...). Support must be clean, smooth and dry before positioning the adhesive for an optimum holding. The Black + phosphorescent tape version make the adhesive always visible even in the dark.
- Support in PVC
- Highly waterproofed
- T° of use: from + 15° C to + 30° C
- Width: 25 or 50 mm (except Black/phosphorescent only in 50 mm)
- 18 or 6 meters rolls

GLASS DOOR SIGNS

ADVANTAGES

READY-TO-APPLY SIGNS

CUSTOMIZATION
ON DEMAND

- Adhesive tape to locate glass doors - signage compliant with existing standards.
- Ready-to-apply signs ; tapes can be cut if needed.
- Available in 2 height: 52 or 100 mm.
- Sold by 2 tapes of 1 m long each.
- Available in 13 models and 7 different colours.

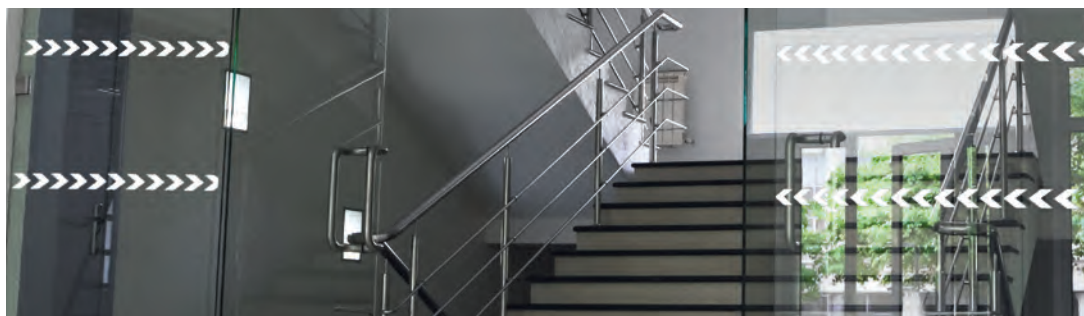

What the law demands:

Any glass surface on a way or nearby must be noticeable (any surface including open or closed doors) using elements contrasting with the immediate surroundings.

Tape has to be at least 50 mm wide.

How to do:

Apply the adhesive tapes horizontally on the glass surface(s) at 1.10M and 1.60M high from the floor.

MATHÉO

PHOTOLUMINESCENT NOVADHESIF

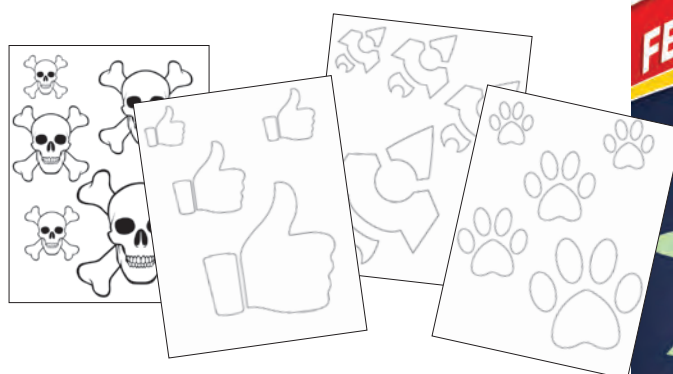

Create as you wish... photoluminescent. Express your creativity to cut the shape you want. You can use the precut shapes at the front of the pack as a model or download more ideas from the website novap.fr.

Your creations recharge with the daylight and are illuminated at night.

Advice to apply: Apply your adhesive on a smooth, dry and non greasy support. Give a homogeneous pressure on the whole surface to fix it properly.

- PVC adhesive photoluminescent film.
- Standard NF X 08-050: class B – 10 min & 60 min.
- Content: 2 pages of 180 x 140 mm.

NOVAP

ECO CONCEPT

BINS

ADVANTAGES

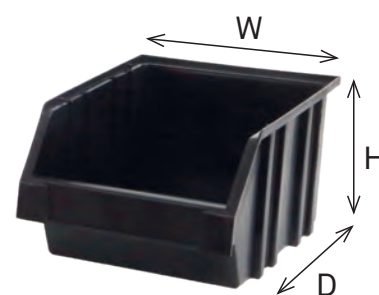

MADE FROM
100% RECYCLED
MATERIALS

The Eco Concept series of semi-open-fronted bins were developed to best respect the environment and to provide you with an alternative to the constraints of sustainable development.

Made of 100% recycled materials (polypropylene), these bins benefit from characteristics appropriate in the industrial world: robust design, flat base, reinforced pillars, retaining notches, very stable fulcrum for stacking, etc.

- Versatile storage use, stocking, handling...
- Integrated label holder. Rear strip for wall mounting.
- Single colour: black.

"PICK'IN"

BINS

ADVANTAGES

- STACKABLE, NESTABLE
- SUITABLE EUROPEAN STANDARDS
- IDEAL FOR THE COLLECTION OF BIG SIZED ITEMS

Large capacity organizing space in stacked position.

- High mechanical strength in the 4 on 1 position. It has been tested with a load of 200 kg uniformly distributed in the 5 bins stack (temperature 20°C).
- Suitable dimensions: with sides of 400 x 400 x 240 mm and 600 x 400 x 250 mm, it can be positioned in the spaces or upon supports and palettes complying with European standards 1200 x 800.
- Space saving: in the stacked position, the PICK'IN bin is accessible via the wide opening in the front and the dividers that allow structuring the organizing space.
- The design of these handles also allows lateral anchoring of the bins between them.

“EUROPEAN” BINS

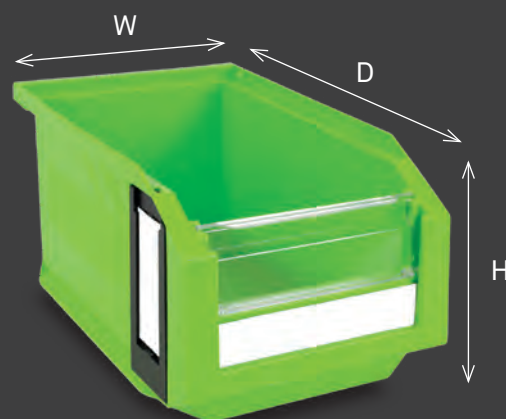

ADVANTAGES
I PERSONALIZE AND
CHOOSE MY
ACCESSORIES

FOR HEAVY DUTIES AND PROFESSIONALS

New generation of semi-open fronted bins from recent technologies. Their computer aided design (CAD) combines mechanical strength, function and design. The EUROPEAN series comprises a complete range of 7 models with European dimensions with plenty of accessories and supporting items.

- Attachment tab for connection on wall rail
- Double wall and pillar reinforcement for high resistance to crushing.
- Rear handle grip.
- Anti-slip bottom and ribbing for greater stability.
- Large label holder on bin front.
- Large supporting surface for stable stacking.

Option:

- Novap patented side label holder
- Hinged cover

“ÉCO” BINS

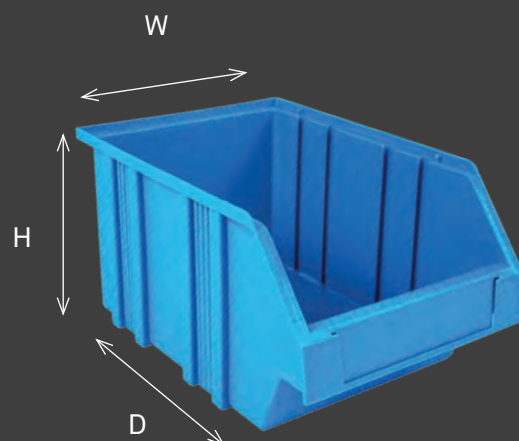

ADVANTAGES

- OUT OF POLYPROPYLENE
- RE-INFORCED CHEMICAL AND THERMAL RESISTANCES

NOVAP semi-open-fronted bins of the “ÉCO” series were designed for multiple use in organizing, handling and storage. Robustly designed and made of highly rigid polypropylene, the bins also have the important quality of high resistance to chemicals (oils, fats, etc.). They also have high thermal resistance (static use: -30° to +70°, dynamic range: -20° to +60°), and features such as: anti-slip treated flat bottom, lock notches, stable bearing points for stacking, etc.

- Attachment tab for connection on wall rail.
- Wide bearing surface and lock notch.
- Reinforced pillars for high resistance to crushing.

- Highly visible label holder.
- Grip handle.
- Anti-slip bottom.

IDEAL FOR STORAGE ON SHELVES OR IN DRAWERS.

- Large depth storage bins. Very large degree of modularity, divisible into up to 20 compartments.
- Interior dividers (crosswise); half walls can be created for better accessibility to parts at the bottom of the bin.
- The inner bin can be inserted in all the other bins to create sub-compartments.
- 5 models of 0.4 litres to 14 litres made of ultra shock resistant polystyrene.
- Great shock resistance, very good stiffness; Good chemical resistance.
- Smooth walls and bottom for better handling of parts.
- Semi-opened front for better visibility and handling of parts.
- Colour: grey.

UNIVERSAL BIN

ADVANTAGES

- VERSATILE
- ERGONOMIC HANDLES
- THE SOLUTION FOR THE TRANSPORT
- 3 YEARS WARRANTY

The 2 handles allow an easy handling.

Available in 10, 17 and 24 L and 4 setup. Chose the most adapted one according to your task, painting and maintenance. Example of use: store your fishing material, carry your tools and your stuff for your electricity duties, take with you your gardening tools, transport your material for the house cleaning or your equipment for the painting.

NOVAP

MOBIL-STEP

STOOLS

STEP STOOLS

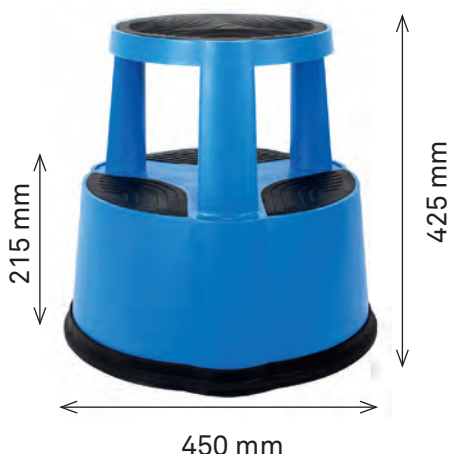

According
**EN
14183**

The NOVAP mobile step is the result of the most up-to-date CAD design techniques and its design has been entrusted to one of the most renowned French designer. Made in multi-base synthetic resin, delivered in 2 separate parts. A simple press on the top part will set it up. The non-slip mats (for the Luxury version) need to be fixed into place after assembly, using the pre-positioned adhesives stickers. The mobile step guarantees high mechanical strength and a resistance against shocks and distortion when bearing weight.

- **VERY STABLE** tested up to 265 kg, compliant with European health and safety legislation, large base diameter, rubber ring bumpers and nonslip mats.
- **MOBILE** Moves thanks to 3 castors, which retract when weight applied.
- **CONVENIENT** Allows users to keep both hands free when moving the step stool with a foot.
- **AND USEFUL EVERYWHERE**
Common uses: offices, shops, workshops, garages, etc...

**MAXIMUM
LOAD
150 KG**

FACE PROTECTION VISOR

ADVANTAGES

- ANTI-SPLASHING
- COMFORTABLE
- NORM EN 166

With the nowadays pandemic of COVID 19, protect yourself and your staff with transparent protection visors (PPE). Anti-splashing, they will be the perfect complement of a FFP2 mask to avoid drops, splashes and spits on the face. They will be very useful for a craftsman, a cashier, an employee in an open-space office, a caregiver, a deliverer or even any individual who would like to protect himself when he is going outside. Our transparent protection visors are developed and manufactured in France to support the local production and to propose quick deliveries.

FACE PROTECTION VISOR

- Transparent screen
- Delivered with 1 medical foam
- Delivered with 1 "frequent use" foam
- Dimension of the mounted product: H 210 mm L 167 mm w 155 mm
- Very resistant and light in the same time
- Weight: 110 gr
- 4 colours available

TERMS AND CONDITIONS OF SALE

1. Orders dealt by our representatives or agents are only confirmed once approved by our head office in Oyonnax.
2. We accept no responsibility for loss or damage of goods once they have left our premises and are in transit, even when postage is free.
3. Our delivery time-scales are approximate and any delay can not give rise for any order cancellation or request for damages.
4. Invoices are payable within 45 days of the month end. Any late payment is liable to penalties calculated at the minimum rate of 3 times the national base rate plus lump sum indemnity for recovery costs of 40 € as detailed in statute 2012-387 of 22nd March 2012 and the decree of 2nd October 2012.
5. In the event of the buyers inability to pay for goods, we reserve the right, even if a part of the order has already been dispatched, to demand the appropriate guarantees to ensure payment commitments are met. We reserve the right to cancel all or part of the order if the buyers are not able to meet these requirements.
6. Items remain the property of the seller until payment is received, and these risks will be borne by the buyer. Deposits will be retained to cover potential losses should an item have to be resold.
7. Full payment for all invoices will be demanded in the case of non-payment of any individual invoice.
8. Our products are charged according the current price structures and include conditional discounts related to quantities, services, procurement, customers. Prices for bulkbuying and promotions are also offered for punctual commercial transactions or repeat transactions depending on products, referencings, collective orders...
9. Our product guarantees are limited to the replacement of goods only in the event that they are considered defective, and any claim must be made within 8 days of receipt.
10. Items can only be returned with our written consent, and any consent does not imply liability. In the event of any objection, only the Bourgen Bresse courts are recognised to deal with such matters.

IMPORTANT: The strength characteristics used to describe our products, even those in writing, are for information purposes only. They are dependant upon their usage and the natural ageing of materials. We accept no responsibility in case of accident. The lengths indicated for the plastic chains are correct to +/- 2%.
